

Safety recall #: **RVXX1402**

Title: Enhanced Cruise Control

Summary: A program error occurred that can result in the active braking feature of the enhanced cruise control to be disabled. As a result, the enhanced cruise control system on the affected vehicles may not automatically activate the brakes as designed, which may result in a vehicle crash.

This issue does not affect the driver warnings of the system or the service and park brakes of the vehicle.

There have been no reports of personal injury or vehicle crash.

*The recall involves approximately **974 vehicles (875 US and 99 Canada)**. Revised list*

Affected Models: 2011-2015 Volvo VNL and VNM
